纽约大规模种树的“隐患”

说明文 · 环境科学 · 全文 307 词 · 逐句精读

¹ In line with longstanding initiatives to expand its green spaces, New York City is planting tens of thousands of trees each year.

纽约市按照其长期以来推行的扩大绿地计划，每年都种植数以万计的树木。

in line with 与……一致；按照

longstanding adj. 长期存在的

initiative n. 倡议；（新）计划

expand v. 扩大

plant v. 种植

tens of thousands of 数以万计的

² They provide shade, lower surface temperatures, absorb a surprising amount of airborne carbon, remove tiny pollutants, and provide wildlife habitat along with just plain beauty.

它们提供树荫，降低地表温度，吸收空气中数量惊人的碳，清除微小的污染物，为野生动物提供栖息地，同时还带来纯粹的美感。

shade n. 树荫

lower v. 降低

surface n. 表面；地表

absorb v. 吸收

airborne adj. 空气中的；大气中的

carbon n. 碳

pollutant n. 污染物

wildlife n. 野生动物

habitat n. 栖息地

along with 连同；以及

plain adj. 纯粹的；单纯的

³ Something could go wrong, though, according to a new study.

不过，根据一项新研究，这当中可能会出问题。

go wrong 出问题；出差错

according to 根据

4 Oaks and sweetgums, which currently account for a majority of the city's trees, produce huge amounts of a chemical substance called isoprene.

橡树和枫香树目前占该市树木的大多数，它们会大量产生一种叫作异戊二烯的化学物质。

oak n. 橡树

sweetgum n. 枫香树

currently adv. 目前

account for (数量上) 占

majority n. 大多数

chemical adj. 化学的

substance n. 物质

isoprene n. 异戊二烯

5 **Harmless** **by itself**, isoprene **interacts** **rapidly** with **polluting** **nitrogen** **oxides** **released** by **vehicles**, buildings and **industry** to form ground-level **ozone** (臭氧) — a major **factor** in many **breathing** problems.

异戊二烯本身无害，但它会与车辆、建筑和工业排放的污染性氮氧化物迅速发生反应，生成近地面臭氧——这是导致许多呼吸问题的一个主要因素。

harmless adj. 无害的

by itself 本身；单独地

interact v. 相互作用；发生反应

rapidly adv. 迅速地

polluting adj. 造成污染的；污染性的

nitrogen n. 氮

oxide n. 氧化物

release v. 释放；排放

vehicle n. 车辆

industry n. 工业

ozone n. 臭氧

factor n. 因素

breathing n. 呼吸

- 6 The research, **carried out** by scientists at the Columbia Climate School and other **institutions**, found that if the city **maintains** past **species patterns** in new plantings, isoprene **production** in Manhattan in coming **decades** will **go up** by about 140%, and **resulting** summer ozone levels **as much as** 30%.

这项由哥伦比亚大学气候学院及其他机构的科学家开展的研究发现，如果该市在新栽种的树木中沿用过去的树种结构，未来几十年曼哈顿的异戊二烯产量将增加约140%，由此导致的夏季臭氧水平将上升多达30%。

carry out 开展；实施

institution n. 机构

maintain v. 保持；维持

species n. 物种

pattern n. 模式；格局

production n. 产生；产量

decade n. 十年

go up 上升

resulting adj. 由此产生的；随之而来的

as much as 多达

7 “We’re all for planting more trees.

“我们完全赞成多种树。

be all for 完全赞成

⁸ They bring so many good things,” said study coauthor
Róisín Commene.

树木带来了那么多好处，” 该研究的合著者罗欣·康曼说。

coauthor n. 合著者

9 “But if we’re not careful, we could make air quality worse.”

“但如果我们不小心，就可能让空气质量变得更糟。”

quality n. 质量

¹⁰ The Parks **Department** is not **oblivious** to the **issue**.

公园管理局并非没有意识到这个问题。

department n. (政府的) 部门; 局

oblivious adj. 未察觉的; 没意识到的

issue n. 问题

¹¹ A study carried out by some of its researchers several years ago concluded that city trees did release isoprene.

几年前，该局的一些研究人员开展的一项研究就得出结论：城市树木确实会释放异戊二烯。

conclude v. 得出结论

¹² “We didn’t make a big deal of that,” said Novem Auyeung, a Parks Department senior scientist.

“我们当时没有对此大做文章，” 公园管理局的资深科学家诺文·欧阳说。

make a big deal of 对……大做文章；小题大做

senior adj. 资深的；高级的

13 She said trees should not be viewed as the enemy.

她说，不应该把树木视为敌人。

view...as 把……看作

enemy n. 敌人

14 “We could plant any trees we want to, if we just **rethink** our **car-centric** **lifestyle**,” she said.

“只要我们重新审视以汽车为中心的生活方式，我们想种什么树都可以，”她说。

rethink v. 重新考虑

car-centric adj. 以汽车为中心的

lifestyle n. 生活方式

15 “We’re not going to go cutting down any big old oaks,” and neither will the department completely stop planting new ones, said Auyeung.

“我们不会去砍掉任何高大的老橡树，” 欧阳说，管理局也不会完全停止种植新的橡树。

cut down 砍倒

completely adv. 完全地

16 “You **have to** think about what you would **lose** if you did that.”

“你得想想，如果那样做，你会失去什么。”

have to 不得不；必须

lose v. 失去

17 Oaks are **keystone species**, she **pointed out**, providing food and habitat for **native insects**, birds and other animals.

她指出，橡树是关键物种，为本地的昆虫、鸟类和其他动物提供食物和栖息地。

keystone species 关键物种

point out 指出

native adj. 本地的；土生的

insect n. 昆虫
