小组讨论让“群体智慧”更准确

说明文 · 心理与社会 · 全文 331 词 · 逐句精读

¹ On March 7, 1907, the English **statistician** Francis Galton **published** a **paper** which **illustrated** what has **come to be known as** the “**wisdom** of **crowds**” **effect**.

1907年3月7日，英国统计学家弗朗西斯·高尔顿发表了一篇论文，阐释了后来被称为“群体智慧”效应的现象。

statistician n. 统计学家

publish v. 发表

paper n. 论文

illustrate v. 阐释；说明

come to be known as 后来被称为

wisdom n. 智慧

crowd n. 人群；群体

effect n. 效应

² The **estimation** experiment he **conducted** showed that **in some cases**, the **average** of **a large number of independent estimates** could be quite **accurate**.

他所做的估算实验表明，在某些情况下，大量独立估计的平均值可以相当准确。

estimation n. 估算；估计

conduct v. 进行；实施

in some cases 在某些情况下

average n. 平均值

a large number of 大量的

independent adj. 独立的

estimate n. 估计；估算

accurate adj. 准确的

³ This effect capitalizes on the fact that when people make errors, those errors aren't always the same.

这一效应利用了这样一个事实：人们出错时，误差并不总是相同的。

capitalize on 利用

the fact that这一事实

make errors 犯错误

⁴ Some people will tend to overestimate, and some to underestimate.

有些人往往会高估，有些人则往往会低估。

tend to 往往会；倾向于

overestimate v. 高估

underestimate v. 低估

⁵ When enough of these errors are **averaged** together, they **cancel each other out**, **resulting in** a more accurate estimate.

把足够多的这类误差平均起来时，它们就会相互抵消，从而得出更准确的估计。

average v. 求……的平均值

cancel...out 抵消

each other 相互

result in 导致；产生

⁶ If people are **similar** and tend to make the same **errors**, then their errors won't cancel each other out.

如果人们彼此相似、往往犯同样的错误，那么他们的误差就不会相互抵消。

similar adj. 相似的

error n. 错误；误差

⁷ **In** more **technical terms**, the wisdom of crowds **requires** that people's estimates be independent.

用更专业的话来说，群体智慧要求人们的估计是相互独立的。

in...terms 用……的话来说

technical adj. 专业的；技术的

require v. 要求（that从句用虚拟语气）

⁸ If, **for whatever reasons**, people's errors become **correlated** or **dependent**, the **accuracy** of the estimate will **go down**.

无论出于什么原因，只要人们的误差变得相互关联或相互依赖，估计的准确度就会下降。

for whatever reasons 无论出于什么原因

correlated adj. 相关的；相互关联的

dependent adj. 依赖的；相互依赖的

accuracy n. 准确度

go down 下降

⁹ But a new study **led by** Joaquin Navajas **offered** an interesting **twist** (转折) on this **classic** **phenomenon**.

但华金·纳瓦哈斯主导的一项新研究为这一经典现象带来了一个有趣的新转折。

led by 由……主导的

offer v. 提供；带来

twist n. 转折；新变化

classic adj. 经典的

phenomenon n. 现象

10 The **key finding** of the study was that when crowds were **further divided into** smaller groups that **were allowed to** have a **discussion**, the averages from these groups were more accurate than those from an **equal** number of independent **individuals**.

这项研究的关键发现是：如果把人群进一步分成可以进行讨论的小组，这些小组得出的平均值就比同等数量的独立个人得出的平均值更准确。

key adj. 关键的

finding n. 发现；研究结果

further adv. 进一步地

divide...into 把……分成

be allowed to 被允许；可以

discussion n. 讨论

equal adj. 相等的；同等的

individual n. 个人

11 For instance, the average obtained from the estimates of four discussion groups of five was significantly more accurate than the average obtained from 20 independent individuals.

例如，由4个5人讨论小组的估计得出的平均值，明显比由20个独立个人得出的平均值更准确。

for instance 例如

obtain v. 获得；得到

significantly adv. 明显地；显著地

¹² In a **follow-up** study with 100 university students, the researchers tried to **get a better sense of** what the group **members** **actually** did in their discussion.

在一项有100名大学生参与的后续研究中，研究人员试图更清楚地了解小组成员在讨论中实际做了什么。

follow-up adj. 后续的

get a sense of 了解；领会

member n. 成员

actually adv. 实际上

¹³ Did they tend to go with those most confident about their estimates?

他们是否往往会听从那些对自己的估计最有把握的人？

go with 听从；采纳（意见）

confident adj. 有把握的；自信的

¹⁴ Did they follow those least willing to change their minds?

他们是否会听从那些最不愿意改变主意的人？

be willing to 愿意

change one's mind 改变主意

15 This happened some of the time, but it wasn't the dominant response.

这种情况有时确实发生，但并不是主要的反应。

some of the time 有时

dominant adj. 主要的；占主导地位的

response n. 反应；回应

¹⁶ Most **frequently**, the groups **reported** that they “shared **arguments** and **reasoned** together”.

各小组最常反映的是，他们“交流了论据，并一起进行推理”。

frequently adv. 经常；频繁地

report v. 报告；反映

argument n. 论据；论点

reason v. 推理

17 **Somehow**, these arguments and this **reasoning** resulted in a **global reduction** in error.

不知何故，这些论据和推理使误差在整体上减少了。

somehow adv. 不知怎么地；以某种方式

reasoning n. 推理

global adj. 整体的；全面的

reduction n. 减少

¹⁸ Although the studies led by Navajas have **limitations** and many questions **remain**, the **potential** **implications** for group discussion and **decision-making** are **enormous**.

尽管纳瓦哈斯主导的这些研究存在局限，许多问题也仍未解决，但它们对群体讨论和决策的潜在影响是巨大的。

limitation n. 局限；限制

remain v. 仍然存在；尚待解决

potential adj. 潜在的

implication n. 影响；含意

decision-making n. 决策

enormous adj. 巨大的
