把自来水煮沸再过滤，可去除大部分微塑料

说明文 · 健康与环境 · 全文 309 词 · 逐句精读

1 Microplastics have become a common source of pollution across the Earth — they have settled in the deep sea and on the Himalayas, stuck inside volcanic rocks, filled the stomachs of seabirds and even fallen in fresh Antarctic snow.

微塑料已成为地球上常见的污染源——它们沉积在深海和喜马拉雅山上，嵌在火山岩里，填满了海鸟的胃，甚至落在南极新下的雪中。

microplastic n. 微塑料

source n. 来源

pollution n. 污染

settle v. 沉积

stick v. 卡住；嵌入

volcanic adj. 火山的

stomach n. 胃

seabird n. 海鸟

Antarctic adj. 南极的

² They are even appearing inside humans.

它们甚至出现在人体内。

appear v. 出现

³ Now, new **research** **suggests** that a simple, cheap **measure** may **significantly** **reduce** the **level** of microplastics in water from your **tap** (水龙头): **boiling** and **filtering** (过滤) it.

现在，新的研究表明，一个简单又便宜的方法或许能大大降低自来水中的微塑料含量：把水煮沸再过滤。

research n. 研究

suggest v. 表明

measure n. 措施

significantly adv. 显著地

reduce v. 降低

level n. 水平；含量

tap n. 水龙头

boil v. 煮沸

filter v. 过滤

⁴ In a study **published** Wednesday in **Environmental** Science & Technology Letters, researchers from China found that boiling tap water for just five minutes — then filtering it after it **cools** — could **remove** **at least** 80 **percent** of its microplastics.

在周三发表于《环境科学与技术快报》的一项研究中，中国研究人员发现，只需把自来水煮沸五分钟，冷却后再过滤，就能去除其中至少80%的微塑料。

publish v. 发表

environmental adj. 环境的

cool v. 冷却

remove v. 去除

at least 至少

percent n. 百分之……

5 **Crucially**, this **process** **relies on** the water **containing** enough **calcium carbonate** (碳酸钙) to **trap** the plastics.

关键是，这个过程依赖于水中含有足够的碳酸钙来困住塑料。

crucially adv. 关键是；至关重要

process n. 过程

rely on 依赖

contain v. 含有

calcium n. 钙

carbonate n. 碳酸盐

trap v. 困住

⁶ In the study, boiling hard water containing 300 **milligrams** of calcium carbonate per liter **led to** an almost 90 percent **drop** in plastics.

研究中，煮沸每升含有300毫克碳酸钙的硬水后，塑料减少了近90%。

milligram n. 毫克

lead to 导致

drop n. 下降

⁷ But in samples with less than 60 milligrams of calcium carbonate per liter, boiling reduced the level of plastics by just 25 percent.

但在每升碳酸钙含量低于60毫克的样本中，煮沸只让塑料含量降低了25%。

sample n. 样本

reduce v. 减少

⁸ Additionally, the research didn't include all types of plastics.

此外，这项研究并没有涵盖所有种类的塑料。

additionally adv. 此外

include v. 包括

9 The team **focused** only **on** three common types — **polystyrene**, **polyethylene** and **polypropylene** — and they didn't study other **chemicals** **previously** found in water **such as** **vinyl chloride**.

研究团队只关注了三种常见类型——聚苯乙烯、聚乙烯和聚丙烯——也没有研究以前在水中发现的其他化学物质，比如氯乙烯。

focus on 关注；集中于

polystyrene n. 聚苯乙烯

polyethylene n. 聚乙烯

polypropylene n. 聚丙烯

chemical n. 化学物质

previously adv. 以前

such as 比如

vinyl n. 乙烯基

chloride n. 氯化物

¹⁰ Still, the **findings** show a **potential** **path forward** for reducing microplastic **exposure** — a task that's becoming **increasingly** difficult.

不过，这些发现指明了一条减少微塑料暴露的潜在途径——而这项任务正变得越来越困难。

finding n. 发现

potential adj. 潜在的

path forward (解决问题的) 途径；出路

exposure n. 接触；暴露

increasingly adv. 越来越

¹¹ Even **bottled water**, scientists found earlier this year, contains 10 to 100 times more microplastics than **originally** thought.

今年早些时候，科学家们发现，就连瓶装水所含的微塑料也是原先认为的10到100倍。

bottled water 瓶装水

originally adv. 原先

¹² Scientists are still trying to **determine** how **harmful** microplastics are — but what they do know has **raised concerns**.

科学家们仍在努力确定微塑料的危害有多大——但他们确实了解到的情况已经引起了担忧。

determine v. 确定

harmful adj. 有害的

raise concerns 引起担忧

¹³ The new study suggests boiling tap water could be a **tool** to **limit** **intake**.

这项新研究表明，把自来水煮沸或许可以成为限制微塑料摄入量的一种手段。

tool n. 手段；工具

limit v. 限制

intake n. 摄入量

14 “The way they **demonstrated** how microplastics were trapped through the boiling process was nice,” Caroline Gauchotte-Lindsay, an environmental **engineer** at the University of Glasgow in Scotland who was not **involved in** the research, tells New Scientist.

“他们展示微塑料如何在煮沸过程中被困住的方式很好，”未参与这项研究的苏格兰格拉斯哥大学环境工程师卡罗琳·高肖特-林赛对《新科学家》杂志表示。

demonstrate v. 展示；证明

engineer n. 工程师

be involved in 参与

15 “We should be **looking into** **upgrading** drinking water **treatment plants** so they remove microplastics.”

“我们应该研究升级饮用水处理厂，让它们能去除微塑料。”

look into 调查；研究

upgrade v. 升级

treatment n. 处理

plant n. 工厂
